Australian Ecosystems

Exploring Australia's vegetation, biodiversity and protection

How do vegetation types vary, how have they well protected?

1. Where do vegetation types occur?

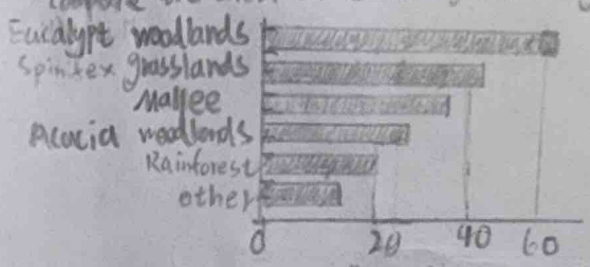

Explore the distribution of Australia's native vegetation types.

Map of Australia showing native vegetation distribution

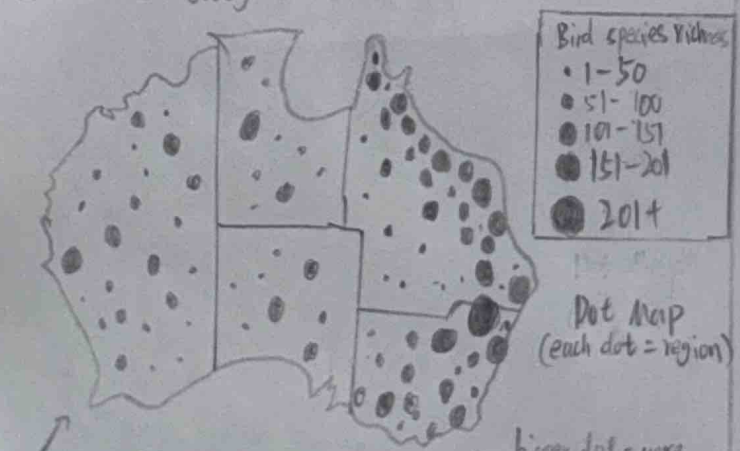

2. Which vegetation types cover the most land?

compare the area of each vegetation type across Australia

3. Where is bird richness highest?

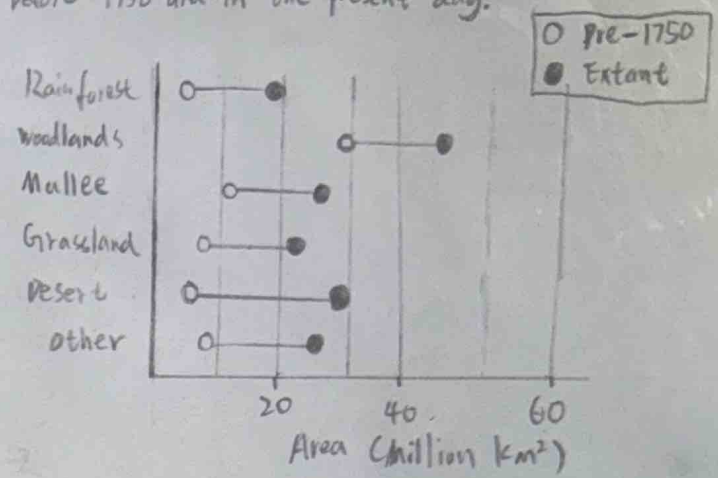

Explore the richness of bird species across Australia's ecosystems.

Next page →

4. How has vegetation changed?

Compare the extent of each vegetation type before 1750 and in the present day.

5. Where is protection located?

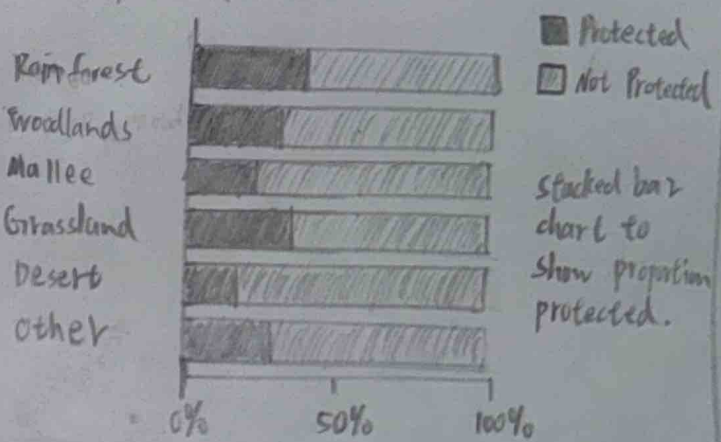

View the proportion of protected areas across Australia.

(show the proportion of land in Protected areas)

6. Is protection balanced across ecosystems?

Compare the proportion of each vegetation type that is protected

stacked bar chart to show proportion protected.
